Open to opportunities in Tunisia and internationally, including remote roles and relocation.

PROFESSIONAL SUMMARY

CKA-certified DevOps Engineer with hands-on experience operating Kubernetes clusters on OVH and Azure AKS, building CI/CD pipelines, managing infrastructure as code, and implementing security and observability controls. A full-stack development background strengthens collaboration with development, product, and business teams.

TECHNICAL SKILLS

Kubernetes & Containers	Kubernetes, AKS, Helm, Docker, containerd, Longhorn, NGINX Ingress, RBAC, HPA
CI/CD & IaC	GitLab CI/CD, GitHub Actions, Jenkins, Terraform, Ansible, Kubeconform, Bash, Python
Cloud - Azure	AKS, ACR, Azure AD, Virtual Machines, Blob Storage, VNets, RBAC
Security	cert-manager, TLS, KMS, Vault/OpenBao, Workload Identity, TokenReview, Service Accounts, Checkov, Kubesec, OPA/Conftest, Semgrep, Trivy
Systems & Observability	Linux, systemd, DNS/DNSSEC, TSIG, Chrony/NTP, Prometheus, Grafana, Alertmanager, ELK Stack, NetBox, Power BI
Development & Data	REST APIs, Node.js, Express, React, TypeScript, Spring Boot, Flutter, RabbitMQ, Socket.io, PostgreSQL, Valkey, MySQL, MongoDB

PROFESSIONAL EXPERIENCE

DevOps Engineer - Bestlab *Jun 2026 - Present*

DevOps team of 3

- Support development teams and design reusable automation for DevOps and full-stack workflows.
- Administer and troubleshoot an OVH-hosted Kubernetes cluster covering RBAC, Service Accounts, containerd, Longhorn, DNS, and inter-pod networking.
- Build reusable GitLab CI/CD jobs for Helm rendering, Kubeconform, Checkov, Kubesec, OPA/Conftest, artifacts, and blocking quality gates.
- Implement TLS with cert-manager, Kubernetes Secrets encryption through KMS/Vault, projected JWT authentication, TokenReview, and least-privilege policies.
- Deployed NetBox through Helm and built Python/REST API synchronization for Kubernetes inventory across 7 nodes and 600+ Services.
- Monitor capacity with Prometheus, Grafana, and Alertmanager; manage drift controls and PowerDNS, DNSSEC/TSIG, and Chrony/NTP services.

Stack: Kubernetes, GitLab CI/CD, Helm, containerd, Longhorn, cert-manager, Vault/OpenBao, NetBox, Prometheus, Grafana, Ansible

Freelance DevOps Engineer - SaaS Client *Jul 2025 - Present*

Remote | Team of 6

- Administer Azure AKS namespaces, RBAC, Azure AD, networking, and TLS through NGINX Ingress.
- Built an end-to-end GitHub Actions pipeline for Docker builds, ACR publishing, and automated AKS deployments, with infrastructure managed through Terraform.
- Improve resilience with HPA, liveness/readiness probes, resource requests and limits, ConfigMaps, and Secrets.
- Troubleshoot CrashLoopBackOff, ErrImagePull, DNS, and inter-pod networking issues in Kubernetes.
- Configure Prometheus/Grafana monitoring and Power BI dashboards while collaborating with product and business teams.

Stack: Azure AKS, Docker, NGINX Ingress, ACR, Azure AD, GitHub Actions, Terraform, Prometheus, Grafana, Power BI

Freelance Full-Stack Developer - Social E-commerce Startup *Oct 2024 - May 2025*

Remote, France | Team of 5

- Developed a social-commerce platform for influencers with React, Node.js, and PostgreSQL, including secure authentication and role-based access.
- Integrated Stripe payments and webhook handling for online payment processing.
- Implemented real-time messaging and social-feed features with Socket.io.

Stack: React, Node.js, PostgreSQL, Stripe API, Socket.io

Freelance Full-Stack Developer - SME Client Websites *Oct 2023 - Sep 2024*

Local and remote | Two-person team

- Partnered with another developer to deliver responsive showcase and corporate websites for SME clients, from design through production deployment.
- Built front-end interfaces with React and back-end functionality with Node.js, MongoDB, and MySQL.
- Containerized and deployed applications with Docker and NGINX, then provided maintenance and client support.

Stack: React, Node.js, MongoDB, MySQL, Docker, NGINX

Full-Stack Developer Intern - Final-Year Engineering Project, TAC-TIC *Feb 2023 - Aug 2023*

Tunis | Smart recycling platform

- Designed and developed a gamified smart-recycling platform based on Spring Boot microservices, RabbitMQ, and MySQL.
- Built React web and Flutter mobile applications; containerized services with Docker and implemented CI/CD with Jenkins.

Stack: Spring Boot, React, Flutter, RabbitMQ, MySQL, Docker, Jenkins

EDUCATION & CERTIFICATIONS

Engineering Degree in Computer Science - ESPRIT, Tunis | Issued Feb 17, 2025

Certified Kubernetes Administrator (CKA) - CNCF / Linux Foundation | Issued Dec 17, 2025
